

ION EXCHANGE POLYMER POWDER

A powder with cationic or anionic functional groups introduced into the polymer matrix, which is a functional polymer powder that can selectively adsorb and separate anions and cations.

✓	Manufacture of Non-uniform Ion Exchange Membrane
✓	Ion-exchange coating material
✓	Manufacture of bipolar ion exchange sheet
✓	Ion selective CDI electrode coating material

	InnoSep Powder-C100	InnoSep Powder-A100
Ionic Type	Cation (-SO ₃ H)	Anion (-NR ₃ Cl)
Backbone Ploymer	PS-DVB	PS-DVB
Average Particle Size (μm)	10~50	10~50
Temperature Stability (°C)	<60	<60
